MIGUEL ALEJANDRO GARCÍA BILBAO

Senior Software Engineer · Full Stack & Applied AI (LLM · RAG) · Angular · .NET · Python

Burgos, Spain · miguel99bilbao@gmail.com · linkedin.com/in/miguelgarciabilbao · github.com/MiguelGarciaBilbao

PROFESSIONAL SUMMARY

Software Engineer with **5 years of full stack experience**, currently on nettrim's **Data Intelligence Hub** building applied AI solutions: **RAG pipelines, embeddings and Hugging Face models** over ESG consulting data. I combine solid product engineering (Angular v20, .NET, Java, Node.js) with direct client work: I understand the business need, turn it into requirements and take it to production. Led a **team of 5 developers** and a legacy migration that cut incidents by **30%**. **Master's in Artificial Intelligence** (UAX, November 2026).

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer | nettrim technology

Remote · February 2026 – Present

Data Intelligence Hub — Applied AI for ESG data

- Built a **RAG** pipeline in **Python** for the ESG consulting platform: document corpus construction, **embedding** generation, vector layer and an **LLM (Amazon Bedrock)** response layer to analyse each company's data.
- Integrated **Hugging Face models** into the processing workflow and enriched the corpus with public information gathered through **OSINT**.
- Improved ESG data consulting with a platform where reports (double materiality, IROs, PAO, water footprint) **feed back into one another**, so each analysis reuses the results of the previous ones.

Frontend & product

- Design the frontend architecture with Angular and TypeScript, prioritising scalability and maintainability.
- Manage complex state with NgRx, RxJS and Signal Stores, improving rendering speed.
- Deliver end-to-end features with Node.js and PostgreSQL: API contracts, implementation and CI/CD deployment, using an agent-assisted coding workflow with technical review of every change.

Software Engineer — Full Stack & Technical Lead | Softeca

Burgos, Spain · Hybrid · June 2022 – February 2026

- Technical lead for a **team of 5 developers** in Scrum: task allocation, code review and unblocking technical issues.
- Led the migration of an **8-module** legacy system to a .NET/Angular architecture, **reducing incidents and turnaround times by 30%**.
- Worked directly with clients across industries: needs discovery, requirements, scoping, estimates and sprint demos, **translating business goals into technical solutions**.
- Designed a **Web Components** library for a **graphical parts-breakdown application for OEM components** with interactive SVG images.
- Built Angular SPAs integrated with .NET and Java (Spring) backends.

Graduate Programme — Software Development | Softeca

Burgos, Spain · On-site · October 2021 – June 2022

- Refactored 2 PHP projects into Angular + .NET, migrating 20+ modules and progressively taking ownership of complete frontend components.

TECHNICAL SKILLS

- **Applied AI:** Python, RAG, embeddings, vector databases, LLMs (Amazon Bedrock, Hugging Face, transformers), corpus construction, OSINT, synthetic data generation, time series
- **Angular:** Angular 2+ to v20, Signals, Standalone Components, SSR/Hydration, RxJS, NgRx, Material, legacy migration
- **Frontend:** TypeScript, JavaScript, Web Components, SVG, micro-frontends, Tailwind, Bootstrap, Responsive Design, Web Performance
- **Backend & data:** .NET / C#, Java (Spring), Node.js, REST APIs, Entity Framework Core · SQL Server, PostgreSQL, MySQL, MongoDB
- **Cloud & DevOps:** AWS (Bedrock, S3, ECS), Azure (App Services, SQL, Blob Storage, Functions), Docker, Azure DevOps, CI/CD, Git
- **Quality & ways of working:** Jest, Jasmine/Karma, Cypress, Playwright, Secure Coding (OWASP), code review, agent-assisted development (Claude Code) · Scrum, Jira

EDUCATION

Master's in Artificial Intelligence — Universidad Alfonso X el Sabio (UAX). March – November 2026. *Thesis: personalised prediction of hypoglycaemia events using time-series models on continuous glucose monitoring data.*

BSc in Computer Engineering — University of Burgos (UBU), 2017–2021

Advanced Angular v18 — Imagina Formación

Languages: Spanish (native) · English (B2)
